

ELMSWELL SLATE ROOF TILES

Elmswell Standard Spanish Slate is distinguished by its robust grey texture and regularity, making it easy to lay. This, along with its competitive price, has made it a popular choice among contractors.

Sourced from the renowned San Mateo Quarry, Spain, which has been active since 1990, this slate is manufactured to the highest standards, complying with EN 12326 and the stringent Norm Français (NF) quality tests.

Elmswell Standard Spanish Slate creates a stunning effect, ideal for both new builds and heritage properties.

Suitability & Use

Elmswell slates were tested at the stringent testing laboratories of Spain with excellent results in all categories having great strength characteristics to meet the demands imposed by the most severe of climatic conditions, this requires the quarry and slates to continually meet the exacting quality criteria and production testing procedures to ensure consistent quality to meet EN12326-2:2011 standards.

Elmswell are sourced from one quarry and the production process is handled by one site to ensure only slates from this location are supplied to us. We have worked with the supplier to ensure the slates are professionally palletised and presented to give maximum protection during transit, shrink wrapped and labelled with relevant Certification and pallet codes to ensure product traceability.

Elmswell a natural product defined by its unique colour and surface characteristics, smooth fine grained natural slate that can have slight variations in shading and texture, more visible in direct sunlight, overtime all slates weather based upon the climatic conditions of the site location.

As a benchmark for quality and selection you should ensure the slates meet the requirements detailed within the “quick quality check list” to ensure you are receiving the very best slate for your proposed natural slate roof.

Origin

The Elmswell natural roofing slates are extracted from a deposit in San Mateo (Ourense) Spain.

Quality

The Elmswell Grey slate, derived from the same rock as the premium grade, allows for greater variations in thickness and flatness. Supplied as a mixed selection, it features uniform grading and excellent quality. This slate undergoes a stringent selection process at the quarry and is tested to meet British and European Standards.
